POST-OFFICE BUILDING, BOSTON.

A red flag with a black centre indicates that the storm is expected to be severe.

The pennants displayed with the flags indicate the direction of the wind; red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrant; below, from the southerly quadrant.

The Hurricane Signal consists of two red flags with black centers, displayed one above the other. It is used to announce the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the great lakes and the Northern Atlantic Coast. The flags are the same as the one now used for the distinctive signal, the pennants being omitted.

By night a red light will indicate easterly winds and a white light above a red light will indicate westerly winds.

Have been most advantageously adopted by the representative mills of this country. Our system will increase your production and overcome troublesome electricity, making your carding run much better. It will reduce your waste account, and generally prove a profitable investment. With our system a perfect Spinning or Weaving atmosphere in any climate or weather is assured, and any degree of humidity is obtainable. Will cool the air in warm weather, and warm it in cold weather. Purifies the air and makes it healthier for the work people. Write for Booklet on Humidification.

There is a vast difference in the quality of signs made by various concerns. We have established a very successful business due to the fact that our work has always been of a very high character. To get the best results we have to employ skillful and high priced artists and mechanics. We admit that we have competition, but we do not atmit that there is produced the high character of work that we do and this is evident by making a comparison, one does not have to be an artist to discover the difference.

THE REECE BUTTON HOLE MACHINE

For Cutting, Working and Barring Button Holes in Boots and Shoes, Clothing, or any fabric requiring a Worked Button Hole.

On Boots and Shoes it procures a saving of from 20 to 40 cents per case. A single operator can cut work and bar from 8000 to 10,000 button holes per day.

On Clothing its capacity is twice that of any other button hole machine, and as this is the only machine which makes an eyelet button hole without necessitating the folding and turning of the garment at each button hole, this in connection with the automatic cutter makes it a far superior machine for this class of work.

The Reece Button Hole Finishing Machine

Saves from 40 to 50 cents a case. Capacity is from 15 to 18 cases per day. Its work is far superior to that done by hand.

This machine collects the thrum ends and stay cord, and stitches them to the inside of button hole pieces, without showing through on the right side, and without folding the work, thereby avoiding any marking or creasing.

The Reece Button Hole Barring Machine

Saves from 20 to 30 cents per case on barred button holes. Its capacity is from 10 to 15 cases per day.

This is the only machine in the market that makes a perfect hand bar, and for uniformity and strength it far surpasses hand work.
